

Table of contents

1. Introduction

1.1 History.....	1
1.2 Concept – PALMSAT.....	4
1.3 Purpose of The study.....	6

2. Methodology – Power System Design Philosophy

2-1 Overview.....	7
2-2 Requirements.....	8
2-3 Solar Panels.....	9
2-4 Power Bus.....	13
2.5 Battery Pack.....	15
2.5.1 Eclipse.....	16
2.5.2 Battery Choice.....	17
2.6 Battery Charge Regulator.....	19
2.6.1 Miniaturization of BCR.....	19
2.6.2 Design – Battery Charge Regulator.....	24
2.7 Design – Power Conditioning Module.....	27
2.8 Design – Sensor and Telemetry Module	29
2.8.1 Design - Current sensor.....	29
2.8.2 Design - Voltage monitor.....	30
2.8.3 Design - Microcomputer.....	

2.9 Final Prototype (Bread Board Model)	
3. Experiments	
3.1 Overview.....	35
3.2 BCR Tests.....	35
3.3 PCM Tests.....	37
4. Result and Analysis	
4.1 The output voltage of the BCR.....	38
4.2 The efficiency of the BCR.....	40
4.3 The output voltage of the PCM of 5V.....	42
4.4 The efficiency of the	43
5V.....	44
4.5 The output voltage of the PCM of 3.3V.....	45
4.6 The efficiency of the PCM of 3.3V.....	..
5. Conclusions and future researches	46
5.1 Conclusions.....	46
5.2 Future researches.....	
References.....	
Appendix
