
Table of contents

CHAPTER 1: INTRODUCTION

1.1 Research Background	1
1.2 Space Solar Power System –Concept and Problems	2
1.3 Multipactor Discharge	4
1.3.1 Two Surface Multipactor Discharge	5
1.3.2 Single Surface Multipactor Discharge	6
1.3.3 Multipactor Discharge Threshold	7
1.4 Research Objective	8

CHAPTER 2 : ANALYSIS METHOD : 3D-FDTD METHOD

2.1 Introduction	9
2.2 3D-FDTD Basic	10
2.3 Problem Conception	13
2.3.1 Solar Cell Modeling	14
2.3.2 Permittivity (ϵ) and Permeability (μ)	15
2.4 Calculation Procedure	
2.4.1 Simulation Example on Vacuum Chamber	16
2.4.2 Simulation Conditions	17
2.4.3 Input Wave	18
2.4.4 Simulation Result	20

CHAPTER 3: SIMULATION AND RESULTS	
3.1 Simulation Machine	22
3.2 Simulation Condition	
3.2.1 Input Wave	23
3.2.2 Cell model	24
3.3 Simulation of electric field distribution calculation in empty chamber	25
3.3.1 Simulation Result	26
3.4 Simulation on N-Electrode and P-electrode cell depends on position	
3.4.1 Simulation Parameters	28
3.4.2 Simulation and Result of Cell a	29
3.4.2 Simulation and Result of Cell b	38
CHAPTER 4: EXPERIMENT AND RESULTS	
4.1 Introduction	45
4.2 Experiment Setup and Devices	46
4.3 Sample	48
4.4 Experiment Setup	49
4.5 Results and Discussion	51
CHAPTER 5 CONCLUSIONS	
5.1 Conclusions	53
5.2 Future Work	54
5.3 References	55
